Linee decise, figura semplice, senza perdere di vista gli aspetti pratici del trasporto e dell’archiviazione , che permettono di sistemare due pouf nell’ingombro di uno, grazie alla sua simmetria.

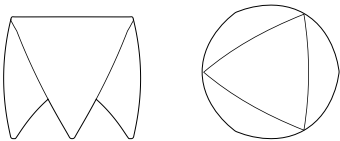

We have tried to join in&outdoor by abandoning the classic shapes using a “space ship” and the first landing on the Moon as inspiration.

Non essere vaso, ma anche esserlo nella sua essenza/as-senza non è un dilemma intellettuale, ma un'idea aperta a infinite possibilità.

Il vuoto come spazio libero, svincolato dalla tristezza della materia, ispiratore nella forma, surreale ma presente, concreto e reale.

Lampo di intuizione per ampliare la percezione: dentro, oltre, attraverso. Ma non era un vaso?

Not being a pot, but also being it in its essence/absence: not an intellectual dilemma, but an idea opened to endless possibilities.

The emptiness as a free space, free of the sadness of the matter, with an inspiring form, surreal but present, concrete and real.

Eureka moment to extend the perception: inside, over, through. But wasn't it a pot?

La versione non verniciata per alcune misure è disponibile oltre al modello lampada a sospensione e lampada portatile con spina anche con kit RGBW a batteria.

Funnel lights is a line of three lamps S, M and L made of rotational Polasy suitable for indoor and outdoor use.

The design follows the "industrial" trend, as well as the vintage painting which thanks to the irregularity of micro dots and shading, accentuate the vintage concept by replicating the effect of passing time, making unique every single item.

In addition to the suspension model, for some sizes, the unpainted version is also available as portable lamp with plug or with RGBW battery kit.

Bell lights è una linea di 3 lampade S, M e L realizzata in Poleasy rotazionale adatta all'utilizzo interno ed esterno.

Il design segue il filone industriale, così come la verniciatura vintage painting che grazie all'irregolarità della micro puntinatura e alla ombreggiatura accentuano il concetto vintage replicando l'effetto del tempo che scorre, rendendo ogni singolo articolo irripetibile.

Omaggio alla tradizione con tecnologia di produzione moderna: questa è l'idea che sta dietro alla scelta di realizzare una lampada che è archetipo delle piantane classiche con paralume.

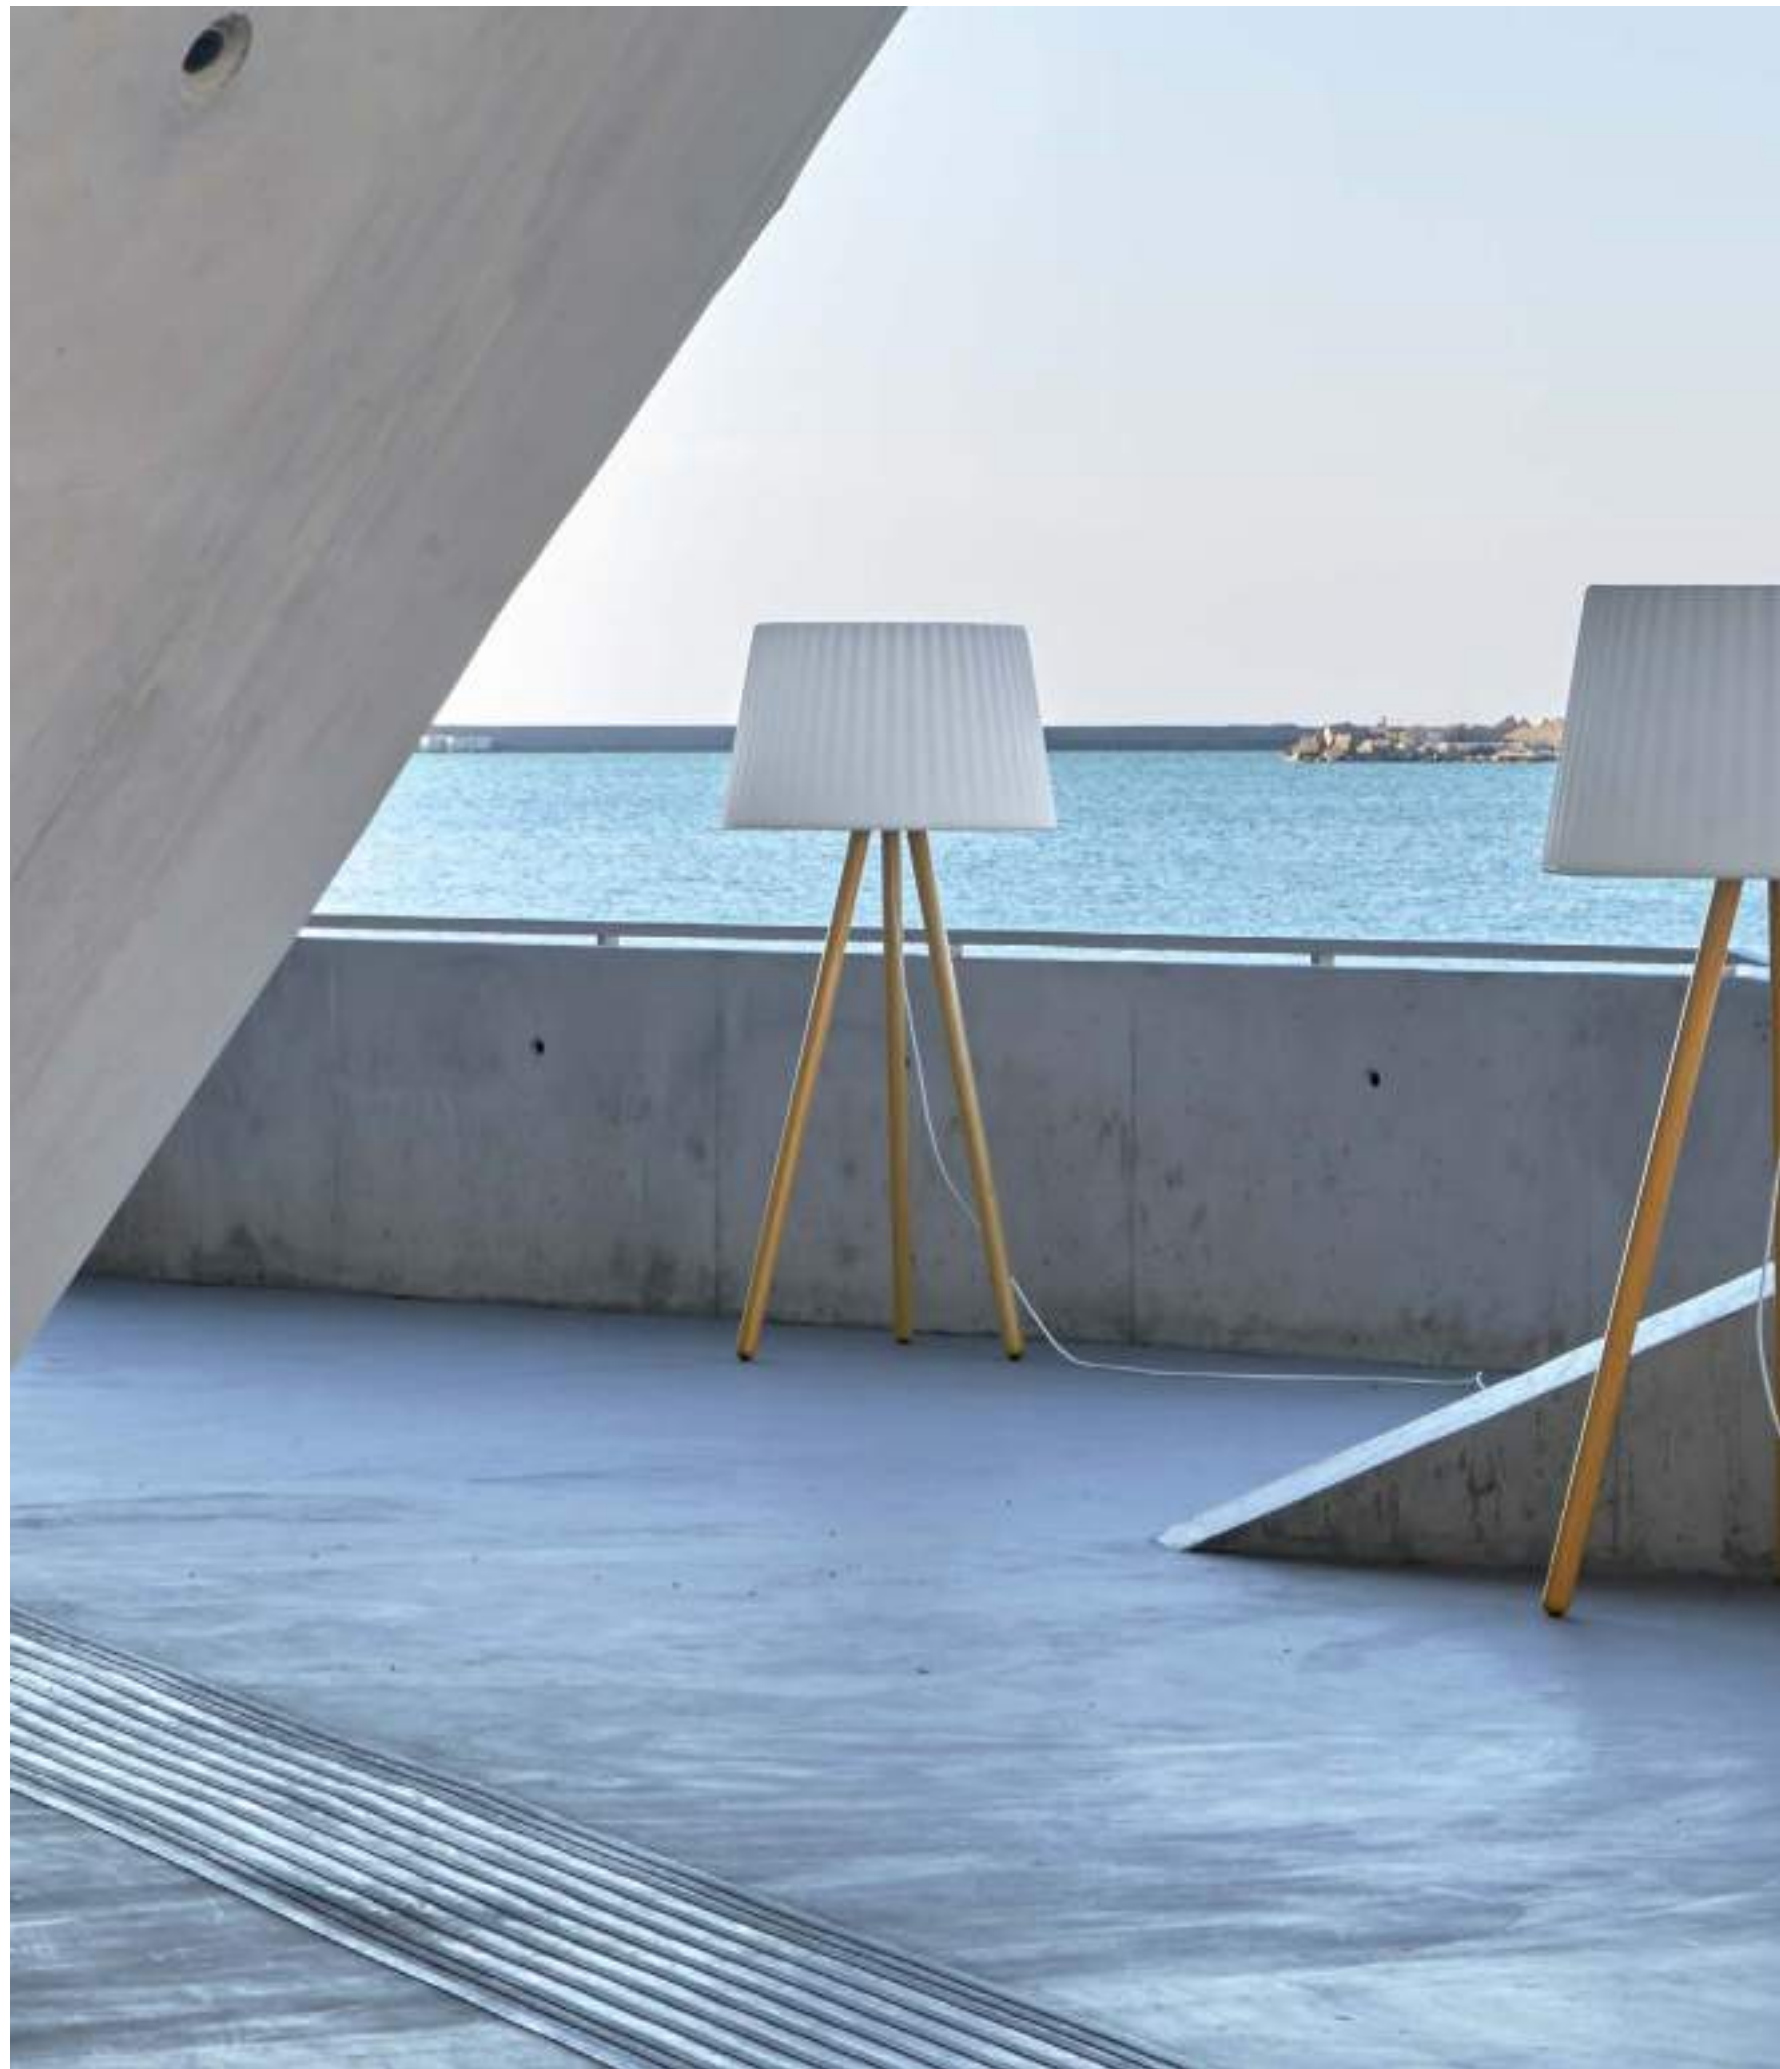

Un concetto razionale che mira a valorizzare un prodotto estremamente radicato nella cultura personale e cerca di stupire con dimensioni importanti e design essenziale. Sintesi di un oggetto che vuole garantire riconoscibilità e facile posizionamento in qualsiasi ambiente.

A tribute to tradition but with a modern production technology: this is the idea that led to the decision of creating a lamp which is the archetype of the classic floor lamps with lampshade.

An extremely rational concept that aims to enhance a product which is so well established in personal culture and shoot for impressing thanks to its important size and essential design. An object that wants to promise recognition and easy placement in any location.

Il concetto di svuotamento asimmetrico della materia, applicato ad un tronco di cono cavo, genera un paralume sorprendente. Nell'alternanza dei vuoti e dei pieni si inseriscono gli effetti di ombra e luce generati da una fonte luminosa nascosta.

The concept of asymmetric emptying of the matter, applied to a hollow of a truncated cone, it generates a surprising lampshade. In the alternation of solids and empties, insert themselves the shadows and light effects generated by a hidden light source.

Non sono solo il design e le tecnologie a fare la differenza nei prodotti MYYOUR: anche per quanto riguarda i materiali l'azienda padovana oggi è in grado di esprimere il massimo grazie a un nuovo polietilene speciale denominato Poleasy, messo a punto attraverso un lavoro di ricerca durato anni con l'obiettivo di eliminare quelle microporosità superficiali responsabili della formazione di antiestetiche patine e, nel tempo, anche di possibili fessurazioni.

Poleasy, risolve definitivamente il problema garantendo alle creazioni MYYOUR superfici più compatte e performance davvero uniche in fatto di durata, lavabilità e brillantezza dei colori.

Design and technology are not the only factors that make the difference in MYYOUR products: also because, as far as the materials are concerned, this company, which is based in Padua, Italy, is able to fully express itself thanks to a new and special type of polyethylene called Poleasy.

Poleasy was developed after long years of research. In fact our research was focused on finding a way to eliminate the microporous surfaces that are responsible for the formation of anti-aesthetic patinas or cracks over time.

Poleasy, has entirely solved this problem by ensuring compactness to the surfaces of MYYOUR's creations and a better performance in terms of durability, washability and color brightness.

OXI DI ZED

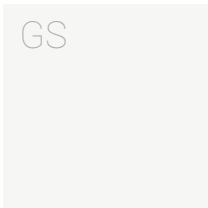

La continua ricerca ed evoluzione porta MYYOUR a scoprire sempre nuovi orizzonti. Il different concept diventa different finishing: MYYOUR presenta l' "ossidato" nei colori rame e ruggine.

L'accurata lavorazione, che mette in simbiosi due materiali chiaramente agli antipodi, prevede l'utilizzo di particelle di ferro come rivestimento, il cui processo di ossidazione viene attivato da prodotti specifici e bloccato da un'apposita vernice trasparente, che ne permette l'utilizzo all'esterno. Così facendo il materiale plastico trasforma la sua natura diventando metallico. Inoltre, essendo il procedimento di ossidazione eseguito manualmente, ogni articolo è unico.

The continuous research and development leads MYYOUR to discover new horizons. The different concept becomes different finishing: MYYOUR presents the "oxidized" in the copper and rust colors.

The careful manufacturing, which puts in symbiosis two materials clearly poles apart, involves the use of iron particles as a coating, whose oxidation process is activated by specific products and stopped by a special transparent varnish which allows the outdoor use. In this way the plastic material transforms its nature becoming metal, it is evident in the fact that a magnet is attracted to it. Since this is a purely manual processing, makes each item different and unique.
